

## Assignment 2

In this assessment, you will practice using basic HTML syntax to create a website.

The website will be tested using the Chrome browser. Prior to submitting your code, ensure that your website runs on Chrome and looks correct. Fix any broken images/

### Submission Instructions

For your submission to be graded, you must submit these files to the assignment dropbox:

1. The completed HTML file. Name your file `A2_FIRSTNAME.html`. For example: `A2_JOHN.html`
2. A screenshot of your webpage (submit a png or jpg file). Name your screenshot `A2_FIRSTNAME.png` or `A2_FIRSTNAME.jpg`  
For example: `A2_JOHN.png`

---

### Academic Integrity

This is an individual assessment and must be completed without the assistance of others (human or ai)

#### Allowed:

- You may use the Internet to search for HTML syntax. If you are using Internet resources for HTML syntax, ensure that the content of these resources align with the content presented in class.

#### Not allowed:

- Following step-by-step tutorials
- Posting assessments to homework help websites, such as Chegg or CourseHero
- Exchanging solutions or resources
- Using generative AI tools, such as ChatGPT, Copilot, etc

---

### Problem Description

Create a website about a movie, tv show, book, or video game character of your choice.

Your webpage must include this content:

- your selected character's name (use an `<h1>`),
- 2 images of your character (use an image from a URL, not a locally saved image)
- at least two paragraphs describing the character
- An list (ordered or unordered) containing the titles of the books / episodes / movies / games the character appears in.
- Link to an external website where the user can learn more about your character.
